EXPERIENCE

Software Engineer 2 Oct 2023 - Present
Epsilon *Bangalore*

- **Designed and implemented** an **Online API orchestration layer** that streamed data from **Databricks Delta to PostgreSQL**, reducing data retrieval latency from **5–10 minutes to under 5 seconds** (~95% improvement), significantly accelerating audience activation workflows
- **Contributed** to the **Gen AI SDLC pilot initiative**, evaluating tools like **Amazon Q** to integrate Gen AI into the software development lifecycle, which led to a **20% gain in development productivity** across participating teams.
- **Developed a Gen AI-powered assistant** for the aggregation platform that interprets natural language prompts to **generate complex SQL queries** and **recommend relevant data tables**, reducing manual configuration time by **~70%** and improving campaign targeting speed and accuracy by **40%**.
- **Built** a **Model Context Protocol (MCP) server** that integrates with any LLM/agent to allow developers to hit APIs via natural language prompts, reducing manual API testing efforts and **accelerating development workflows by 30–40%**.

Solution Engineer May 2021 - Oct 2023
Deqode Solutions *Pune*

- Built **scalable UI solutions** for enterprise-grade LMS platforms serving teachers, students, and administrators.
- **Built a Redux-based state management system** that reduced app latency by **~35%**, improving user experience across dynamic dashboard interactions.
- **Contributed to web3 marketplace features** that enabled creators to mint and sell NFTs, using **React, Web3.js, and smart contract integrations**, helping creators monetize digital assets.
- **Developed a modular, whitelabel UI architecture** using **monorepo and microfrontend patterns**, enabling **rapid delivery** to multiple clients and reducing feature deployment time by **40%**.
- Contributed to the borrower profiling system, supporting **$500K+** in secure decentralized loans during the beta phase.

EDUCATION

M.Tech Computer Science, G.H Raisoni College of Engineering 2023
CGPA: 9.03

B.E Computer Science, G.H Raisoni College of Engineering 2021
CGPA: 8.6

Diploma Computer Technology, Shri Datta Meghe Polytechnic 2018
Percentage: 75

SKILLS

Languages	JavaScript, TypeScript, Python, Java
Frameworks	ReactJs, NextJs, NodeJs, FastAPI
Database	PostgreSQL, MongoDB, Firebase, Databricks
Cloud & DevOps	AWS, Docker, Terraform, Jenkins, GoCD
Others	GenAI, LLM, Blockchain, Cypress, Jest, Taiko

PROJECTS

No-Code Backend Service Created a user-friendly platform that allows non-technical users to generate custom backend endpoints with ease, using a drag-and-drop interface built with **JavaScript** and **Node.js**. This platform streamlines the backend development process, making it accessible and manageable for a wider range of individuals, thereby reducing the dependency on technical resources.

Decentralized Stock Exchange. Designed and built a decentralized stock exchange on the **Solana blockchain**, with **Node.js** for the backend and **React.js** for the frontend, empowering retail investors to trade in small businesses and democratizing access to capital markets.

Blockchain-Based Healthcare System Developed a cryptocurrency (**ERC-20 on Ethereum blockchain**) for the healthcare industry and created a portal to utilize this token for various healthcare services such as disease detection using image classification with **Python**

AWARDS AND RECOGNITION

- **Founding Team member – GHRCESat (ISRO Satellite)**: Core member of the founding team that successfully launched the college's first nano-satellite in collaboration with ISRO (2021).
- **Sony Hall of Fame LINK**: Recognized by Sony in their Hall of Fame for responsible vulnerability disclosure.
- **ESET Acknowledgement**: Credited by ESET for reporting a security vulnerability in their web application.
- **Intel Acknowledgement**: Received multiple acknowledgements from Intel for responsibly disclosing web application vulnerabilities.
